

Facemate FFP2 flat fold respirator masks

Irema has been manufacturing face masks under the Facemate® brand in Ireland for over 30 years.

Certified Facemate flat fold respirator masks protect people working in environments where harmful particles, pathogens and aerosols present a danger to their respiratory system and long-term health. Healthcare workers, medical and military personnel, cleanroom operatives, industrial, agriculture and construction workers will all benefit from using Irema's Facemate FFP2 respirator mask.

Irema's Facemate FFP2 respirator masks are standards-compliant and tested by internationally accredited independent laboratories. They are manufactured using Irema's proprietary melt-blown filter material.

Features

- Lightweight
- Horizontal flat fold for greater protection and comfort
- Glass fibre and latex free
- Individually wrapped
- Tested for differing face profiles and head sizes
- Adjustable nose piece with elastic straps for optimal fit and seal
- Latest filter design technology providing lowest possible breathing resistance
- Hypoallergenic materials provide extra comfort when worn for extended periods

Specification

- Class: FFP2NR
- Test Standard: EN 149:2001 + A1:2009
- CE Number 636991 NL
- Bacterial Filtration Efficiency BFE: ≥94% of all particles measuring up to 0.3µm

Facemate respirator masks are individually wrapped, packaged 25 per box with 4 boxes per case.

Filter efficiency	Breathing Resistance (mbar) 30L/min	Defined Protection Level	Nominal Protection Factor
≥94%	>0.7	10 OEL	12 OEL
