

Facemate N95 respirator masks

Irema has been manufacturing face masks under the Facemate® brand in Ireland for over 30 years.

Facemate flat fold respirator masks protect people working in environments where harmful particles, pathogens and aerosols present a danger to their respiratory system and long-term health. They are horizontally flat folded for greater protection and comfort.

Irema's Facemate N95 respirator masks are NIOSH compliant and tested by internationally accredited independent laboratories. They are manufactured using Irema's proprietary melt-blown filtration material.

Features

- Lightweight
- 100% synthetic
- Glass fibre and latex free
- Tested for differing face profiles and head sizes
- Lowest possible breathing resistance
- Individually wrapped
- Adjustable nose piece with elastic straps for optimal fit and seal
- Hypoallergenic materials provide extra comfort when worn for extended periods

Specification

- Test Standard: EN 14683
- N95 approval number: TC-84A-8129, 42 CFR Part 84
- Bacterial Filtration Efficiency BFE: ≥95% of all particles measuring up to 0.3µm

Facemate respirator masks are individually wrapped, packaged 25 per box with 4 boxes per case.

Filter efficiency	Breathing Resistance (mmH2O) 85L/min
95% minimum	≤35
